

INDOOR/OUTDOOR - FLEXIBLE WIRE BRAID

RXT ArmaKit

Low Smoke **Zero Halogen**

Flexible Wire Braid Armour

Low Smoke Zero Halogen

The ArmaKit® RXT Gland is a two-part gland designed for use with all types of screened flexible wire braid, or wire braid armour cables. An integral polychloroprene environmental seal provides full protection against high power jets of liquid and is 100% dust tight, an internal brass washer ensures the seal will not deform as the glands are torqued down.

ArmaKit® RXT Glands are suitable for use in indoor or outdoor environments where moisture or dust exposure is anticipated.

LSZH ArmaKit® RXT Gland Kits

- For indoor use or outdoor use.
- Two-part.
- Precision manufactured from high quality extrusion brass.
- Supplied in kits containing;
- M20s-M32 2 glands, 2 locknuts, 2 earth tags, 2 LSZH shrouds
- M40-M50 1 gland, 1 locknut, 1 earth tag, 1 LSZH shroud

Standards: EN 60529

EN 50262

Protection: IP54

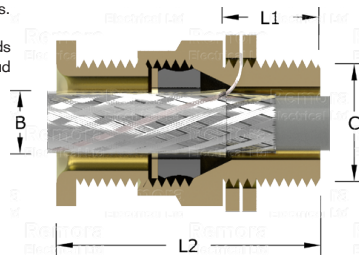

IP66 (If fitted with sealing washer)

Temperature Range: -60°C to 130°C

Material (Gland): Brass BS 2874 CZ121 Pb3

Material (Seal): LSZH Silicone

Material (Shroud): LSZH Silicone
