

Blade

Copper Blade Terminal Lugs 600/1000V

Blade lugs are designed for terminating conductors terminal blocks. Manufactured from copper strip, rolled, brazed and tin plated to BS 1872 Part 2 for corrosion resistance and suitable for use up to 150°C. Designed and manufactured to meet the performance requirements of BS EN61238-1-2003 and BS 4579. Nickel plated lugs are available for high temperature applications up to 343°C.

Temperature Range: up to 150°C

Material: Copper BS EN 61238-1-2003 and BS 4579 Part 1

Plating: Tin BS 1872 Part 2
