Steel Wire Armour

Low Smoke Zero Halogen

The ArmaKit® CW Gland is a four-part gland designed for use with all Steel Wire Armoured PVC and LSF cables. The integral polychloroprene environmental seal provides full protection against high power jets of liquid and is 100% dust tight. The separate cone-and-ring design of the three-part ArmaKit® CW Gland prevents twisting of the armour wires during installation and an internal brass washer ensures the seal will not deform as the glands are torqued down.

Cable retention and earth continuity is achieved via mechanical clamping of the cable armour by the internal cone-and-ring.
